Frederico Azevedo  
and Unlimited Earth Care  
Celebrate a Quarter Century

For over 25 years, Frederico Azevedo, the master designer behind Unlimited Earth Care, has been plying his craft. Robb Report magazine has called him "the most influential landscape designer in the Hamptons," and it's easy to see why. Born in Porto Alegre, Brazil, in 1962, Azevedo has spent his life studying landscape design around the world. But after travels in Brazil, England and the United States, this talented landscaper decided to settle in the Hamptons.

With its unique mix of farms, woods, dunes and about a half dozen other types of land, the Hamptons is universally acknowledged as one of the most beautiful places on Earth.

Azevedo is acutely aware of that, and makes sure to incorporate his surroundings into every design. Azevedo's approach is a holistic one. He eschews fads, and thinks about everything that goes into a site: not just where it is, but what's nearby. Not just its past, but its future. As he told AVENUE in 2015, "The trick is not to know what looks good now, but what will look good five years from now. These environments are always evolving."

Azevedo is a true renaissance designer, as comfortable designing around an ultramodern Norman Foster house as a wooden shingled mansion. For his landscaping skills, he's been rewarded with the respect of his clients and his

peers alike. He is a member of the Association of Professional Landscape Designers, the American Horticultural Society and the Horticultural Alliance of the Hamptons.

And he gives back to his community, too. On June 16th, Azevedo hosted a 25th anniversary celebration at the Unlimited Earth Care store in Bridgehampton. Locals shopped, talked and, yes, drank cocktails to celebrate the man and his success.

Here's to you, Frederico—and to 25 more! ♦
